Profesional experiences

European Space Agency · Data Science intern

Madrid - 2024/03 to 2024/08

Private tutor : CS & programming

Remote/Lyon - Freelance - since 2021/10

- Prepared and taught more than 100 private Computer Science & programming lessons to 6 students aged 12 to 21.

Onepoint · Data Science & Engineering intern

Remote/Paris - 2023/05 to 2023/08

- Redesigned and implemented a NLP R&D project to extract tech & science trends over time from 1M+ scientific papers.
- Reduced query time of the science & tech topics search engine from 30 to 5 minutes in deployment.

Farswap · Co-founder, Lead Front-end dev

Remote - Part-time - 2022/04 to 2022/11

- Engineered and designed a Web 3 Decentralized Exchange platform MVP on the NEAR ecosystem with a Svelte front-end and Rust smart contracts. Ranked in the top 10 at the NEAR x Encode 2022 hackathon.
- Built and designed a landing page that brought 2.5k users to our private beta.
- Pitched the project on stage at NEAR Con 2022 and made business connections.

AJVDEC-Togo · Backend developer & volunteer

Lomé (Togo) - 2022/06 to 2022/08

- Engineered a C# ASP.NET Core API for an accessible & low data consumption audio-based Youtube alternative that empowers both literate and illiterate Togolese people online. Used Agile methodology.
- Invested myself in humanitarian tasks such as giving daily computer lessons to more than 60 orphans.

Coddity · Fullstack web development intern

Paris - 2021/04 to 2021/06

- Developed a React.js dashboard, including an API with Node.js, MySQL & NoSQL which featured security insights and an Ansible GUI using WebSockets. Reduced friction with maintenance tasks.
- Overhauled their blog using SvelteKit which reduced development friction, and improved speed with SSR. Went from UI/UX redesign to full production deployment in only 1 week.

Education

INSA Lyon · Computer Science engineering

2021/09 to 2024/09 (expected graduation)

Universitat Politècnica de Catalunya · Erasmus semester

2023/09 to 2024/01

Master courses at FIB. Notably on NLP, AI in games, AI Ethics, AI for interaction with robots and Stochastic Modeling

IUT de Paris rives de Seine · DUT Informatique

Graduated - 2019 to 2021

Open-source work

jiro-nn · Lead developer

- Deep Learning and data preprocessing framework in Rust
- 113+ stars on [Github](https://github.com)
- Presented at University College of London's "Scientific Computing in Rust 2023" conference

Awards

- Winner, *Bourse Coddity 2021* (Hackathon, 1000€)
- Finalist, *Web Monetization Challenge 2021* (Game Jam, 100\$)
- Finalist, Alteca Coding game challenge 10/2022 (200€)
- Finalist, *NEAR x Encode 2022* (Hackathon, Web3)

Languages

- English (C1)
- Spanish (B1)
- Russian (A1)
- French (mother tongue)

Tools & skills

- **Systems:** Rust, C++
- **Back:** TypeScript, Node.js, Elixir, Java, Go, Python
- **Front:** Svelte, React, HTML, CSS, JS
- **DevOps:** Git, Linux, Docker, nginx
- **Databases:** SQL, Postgres, MongoDB
- **Gamedev:** Godot Engine, UE4
